Manipal, Karnataka

Education

Manipal Institute of Technology | GPA: 8.54/10

Manipal, Karnataka

Bachelor's of Technology in Information Technology

August 2024 – May 2028

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, System Design, Data Analytics

Experience

EaseOps

June 2026 – July 2026

Frontend Developer Intern

- Developed, tested, and debugged software features across enterprise web and mobile applications, improving product quality, reliability, and maintainability.
- Diagnosed and resolved client-reported software defects through log analysis, API inspection, and root-cause analysis, improving system performance and reducing recurring issues.
- Collaborated with cross-functional engineering and product teams to gather feature requirements, implement technical solutions, and improve frontend-backend integration.
- Implemented frontend features based on product requirements and collaborated with backend developers to ensure seamless API integration and functionality.

Development Team Member

December 2025 – Present

Student Council, MIT Manipal

- Designed and developed a scalable Club Management System using modular software architecture, implementing secure role-based authentication, approval workflows, and RESTful APIs.
- Built responsive user interfaces and integrated RESTful APIs while collaborating with stakeholders to deliver maintainable, production-ready software.

App Dev Head

July 2025 – Present

ACM Manipal

- Led a team of developers across the software development lifecycle, conducting code reviews, mentoring junior members, and ensuring timely delivery of high-quality software solutions.
- Conducted workshops on object-oriented programming, software design principles, and engineering best practices while coordinating cross-functional technical teams.

Software Development Intern

January 2026 – April 2026

Glo School (Gyan Saarthi Education Pvt Ltd)

- Designed and implemented scalable backend services using Flutter and Firebase, optimizing Firestore data models for reliable real-time synchronization.
- Delivered production-ready software features through iterative development, testing, debugging, and collaboration within an agile engineering team. ([View LOR](#))

Projects

Dhan Mitra – Fintech Simulation Platform | *Flutter, Firebase*

January 2026 – Present

- Designed and developed a modular cross-platform fintech application following object-oriented design principles, integrating financial education, virtual trading, and portfolio management.
- Designed scalable Firestore database architecture with secure authentication and real-time synchronization; implemented SIP, SWP, and stock market simulation engines with portfolio and wallet management.
- Implemented modular state management and reusable UI components, improving code maintainability and enabling scalable feature development.

Revels OM Portal | *React, Node.js, PostgreSQL*

December 2025 – January 2026

- Designed scalable backend architecture supporting 700+ participants through optimized PostgreSQL schemas, RESTful APIs, and efficient booking workflows.
- Implemented role-based authorization and scalable participant management workflows, ensuring high availability and reliable performance under peak concurrent traffic.

Xuberance Event Management App | *Flutter, Firebase*

August 2022 – October 2022

- Developed a cross-platform event management application using reusable Flutter architecture and Firebase real-time synchronization, enabling seamless event registration and live updates for 200+ participants.
- Implemented Firebase Authentication, Firestore integration, and push notifications to support seamless participant engagement during the event.

Skills

Languages: Java, Python, C, SQL

Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, Software Design, System Design, REST APIs, Backend Development, Frontend Development, Database Design, Testing

Frameworks & Libraries: Flutter, React, Next.js, Node.js, Firebase

Databases: PostgreSQL, Firestore

Tools: Git, GitHub, Linear, Figma, Canva
