Education

Manipal Institute of Technology | GPA: 8.54/10

Manipal, Karnataka

Bachelor's of Technology in Information Technology

August 2024 – May 2028

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, System Design, Data Analytics

Experience

EaseOps

June 2026 – July 2026

Frontend Developer Intern

- Engineered the Asset Management, Reminders, and Leaderboard modules for an enterprise Hospital Management System, delivering cross-platform screens in Flutter (mobile and web) from product requirements to production.
- Developed interactive dashboards that surfaced asset and activity metrics, integrating the UI with backend REST APIs for data fetching, state management, and error handling.
- Collaborated cross-functionally with backend engineers to integrate frontend components with backend services, resolving data-mapping and pagination defects that were breaking list and dashboard views in production.
- Debugged and resolved client-reported production defects by inspecting API responses and application logs to trace root causes, reducing recurring frontend-backend synchronization issues.

Glo School (Gyan Saarthi Education Pvt Ltd)

January 2026 – April 2026

Software Development Intern

- Built a Flutter and Firebase web application for kindergarten teachers, enabling daily task management, lesson planning, instructional workflows, and student feedback through a centralized dashboard.
- Designed Firestore data models and implemented application features with real-time synchronization, collaborating in an Agile team to deliver, test, and debug features across the full application stack. ([View LOR](#))

Projects

Dhan Mitra – Fintech Simulation Platform | *Flutter, Firebase* | [GitHub](#) | [Live Demo](#)

January 2026 – Present

- Developed a cross-platform fintech learning platform using Flutter and Firebase, combining multilingual investment courses, scenario-based quizzes, and virtual trading to help users learn investing through hands-on practice.
- Implemented SIP, SWP, and stock-market simulation engines with Firestore, alongside AI-generated personalized quiz feedback, authentication, wallet management, and real-time portfolio synchronization.
- Architected the application using modular state management and reusable components, applying object-oriented design principles to support scalable feature development and future financial learning modules.

Revels OM Portal | *React, Node.js, PostgreSQL*

December 2025 – January 2026

- Built a scalable backend for a room booking portal serving 700+ outstation participants using Node.js and PostgreSQL, implementing normalized database schemas and REST APIs for room allocation and booking management.
- Implemented role-based authorization and booking workflows that sustained peak concurrent registration traffic without double-booking slots.

Xuberance Event Management App | *Flutter, Firebase*

August 2022 – October 2022

- Built a cross-platform event app in Flutter and Firebase for 200+ participants, supporting event registration and live schedule updates.
- Implemented Firebase Authentication, Firestore integration, and push notifications to keep participants updated during the event.

Leadership

Development Team

December 2025 – Present

Student Council, MIT Manipal

- Develop backend systems and web portals for college fests, implementing REST APIs and features to streamline event operations.
- Built a Club Management System with role-based authentication, multi-level approval workflows, and REST APIs used to coordinate club activities across campus.

App Dev Head

July 2025 – Present

ACM Manipal

- Lead the App Development domain by organizing technical sessions, mentoring members, and coordinating development activities.

Technical Skills

Languages: Java, Python, C, JavaScript, Dart, SQL

Frameworks & Libraries: React, Next.js, Node.js, Flutter

Backend & Databases: REST APIs, Firebase, PostgreSQL, Firestore, Database Design, Backend Development

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, System Design

Developer Tools: Git, GitHub, Postman, Figma, Linear
